Bogdan Cazacu

Security Engineering Leader | Senior Security Systems Engineer |
CISSP | Cloud & Infrastructure Security | Security Operations | Open
Source Governance

Cracow, Małopolskie, Poland

Summary

CISSP-certified security engineering and infrastructure leader with 18+ years of experience across cloud security, infrastructure security, DevSecOps, security operations, governance, and regulated enterprise environments. I focus on translating security risk into operational decisions, building repeatable security controls, mentoring technical teams, and supporting secure infrastructure delivery across GCP, Azure, AWS, banking, technology, life sciences, and consulting environments. At EPAM, I work across security engineering, secure infrastructure delivery, cloud security controls, Terraform governance, CI/CD security, monitoring, incident readiness, documentation, and stakeholder communication. I also serve as Co-Head of the Open Source Practice within the CTO Office, focusing on open source governance, dependency risk, licensing, vulnerability handling, secure adoption, and coordination between security, legal, engineering, and leadership stakeholders. Earlier experience includes security infrastructure leadership in banking, CyberArk/PAM, VPN, SD-WAN, DLP, proxy platforms, ISO 27001 implementation and audits, secure remote access architecture, infrastructure automation, disaster recovery, and business continuity. Core areas: Security Engineering Leadership | Cloud Security | Infrastructure Security | Security Operations | DevSecOps | Open Source Governance | ISO 27001 | NIST | Zero Trust | Incident Response | Vulnerability Management | Terraform | Ansible | Docker | Kubernetes | GCP | Azure | AWS

Experience

EPAM Systems

4 years 2 months

Senior Security Systems Engineer
December 2025 - Present (6 months)

Cracow

- Lead secure infrastructure delivery across cloud and enterprise environments, focusing on security controls and operational reliability.
- Mentor engineers on secure automation, Terraform governance, and CI/CD security practices.
- Act as an escalation point for complex production issues, supporting incident investigation and stakeholder communication.

Co-Head, Open Source Practice (CTO Office)

September 2025 - Present (9 months)

Cracow

- Co-lead open source governance initiatives focusing on security risk, licensing, and compliance across engineering teams.
- Define policies and operating guidelines for secure open source consumption and vulnerability handling.
- Coordinate with security, legal, and engineering stakeholders to align open source usage with cybersecurity objectives.

Client Project Allocation: ASML - Security Infrastructure Engineer

August 2025 - January 2026 (6 months)

Cracow

- Contributed to secure platform engineering initiatives, focusing on Kubernetes and GitOps deployment workflows.
- Automated certificate lifecycle and secrets management to enhance security protocols.
- Supported the development of platform standards and compliance-aligned infrastructure processes.
- Improved CI/CD hardening and observability practices to strengthen infrastructure security controls.

Client Project Allocation: Holcim - Software Maintenance Engineer

January 2025 - December 2025 (1 year)

Cracow

- Managed cloud infrastructure on Google Cloud Platform (GCP) to ensure optimal performance and scalability.
- Oversaw migrations and technical upgrades, enhancing operational efficiency and modernizing systems.
- Conducted incident analysis and root cause investigations, minimizing downtime and preventing recurrence.
- Administered security and access management to safeguard sensitive data and ensure compliance.

Senior System Engineer

April 2022 - December 2025 (3 years 9 months)

Cracow

- Led Infrastructure as Code initiatives across AWS, Azure, and GCP, enhancing security controls in cloud environments.
- Mentored teams on secure CI/CD practices and automation using Terraform and Ansible.
- Collaborated with security teams to improve logging, monitoring, and incident readiness.
- Supported compliance efforts aligned with ISO 27001 and NIST frameworks.

Client Project Allocation: Mandiant / Google Cloud - Cyber Security Engineer

October 2023 - June 2025 (1 year 9 months)

Cracow

- Led security integrations and contributed to security architecture design for enterprise deployments on Google Cloud Platform.
- Supported security operations by investigating alerts and assisting with incident response activities.
- Delivered internal security training sessions aligned with ISO 27001 and Zero Trust principles.

Client Project Allocation: UBS - Build Engineer

June 2022 - March 2023 (10 months)

Cracow

- Operated and maintained secure build and release pipelines using Jenkins, GitLab, and Docker.
- Embedded security checks into CI/CD workflows, enhancing DevSecOps practices across teams.
- Acted as an escalation point for build and deployment issues, ensuring service availability.
- Collaborated with cross-functional teams to align build processes with security standards.

Team Clockworks RO108

FIRST Robotics Mentor

October 2019 - March 2024 (4 years 6 months)

Bucharest, Romania

- Provided structured guidance on secure system configuration, access control basics, and safe use of shared infrastructure in team environments.
- Introduced cybersecurity awareness concepts, including risk identification, responsible credential handling, and incident prevention practices.

- Defined clear operating guidelines and technical standards to ensure consistent and reliable system usage during competition and development activities.
- Conducted lightweight risk assessments on systems and workflows, identifying potential exposure areas and recommending corrective actions.
- Supported troubleshooting and incident resolution during time-critical events, ensuring system availability and operational continuity.
- Communicated technical risks and mitigation actions clearly to non-technical stakeholders, fostering accountability and adherence to agreed practices.

SecretChip Consulting

Chief Executive Officer / Infrastructure Architect

January 2018 - December 2021 (4 years)

Bucharest

- Owned end-to-end infrastructure and security operations for SME clients across on-prem, virtualized, and hybrid environments.
- Designed and maintained secure network, server, backup, and disaster recovery architectures with a focus on availability and data protection.
- Led incident response activities, including investigation, containment, remediation, and post-incident follow-up.
- Defined and enforced operational security standards, access controls, and hardening guidelines across client environments.
- Automated operational tasks using Bash, PowerShell, Ansible, and Python to improve consistency and reduce operational risk.
- Served as primary security and compliance contact for clients, supporting ISO-aligned controls and GDPR requirements.
- Managed vendor relationships, solution selection, and implementation for security and infrastructure tooling

Garanti BBVA Romania

Senior Security Infrastructure Engineer

December 2019 - April 2021 (1 year 5 months)

Bucharest, Romania

- Operated and maintained critical security infrastructure including identity providers, VPNs, SD-WAN, DLP, and web and mail proxy platforms in a regulated banking environment.
- Designed, implemented, and operated the end-to-end security architecture for the organization's Work From Home program.
- Defined secure remote access patterns covering authentication, privileged access, session control, and data protection.

- Led the selection, integration, and operational handover of remote access technologies including VPNs, bastion access, secrets management, and load balancing components.
- Established access control rules, operational procedures, and escalation paths to support remote users at scale.
- Supported incident response activities related to authentication failures, access misuse, and data protection events.
- Conducted internal ISO 27001 audits and translated policy updates into technical control changes.
- Worked closely with risk, compliance, and IT operations teams to ensure business continuity and regulatory alignment

Cyber Security Research Center from Romania

Chief Information Officer

April 2013 - June 2019 (6 years 3 months)

Bucharest

- Directed the development and operation of secure network and infrastructure environments supporting research and public facing security events.
- Established incident response capabilities and operational procedures to manage security issues during live and time-critical activities.
- Coordinated volunteer technical and security teams, assigning responsibilities, managing escalations, and ensuring operational continuity.
- Defined security policies, operational guidelines, and technical standards to support consistent and secure system usage.
- Oversaw risk identification and mitigation activities across infrastructure and event-driven environments.
- Produced policy documentation and technical architecture materials to support internal training and security awareness initiatives.
- Acted as the primary point of contact for security-related decisions, vendor coordination, and stakeholder communication.

Strauss Group Inc.

Software Administrator

August 2016 - November 2017 (1 year 4 months)

Bucharest

- Operated and maintained on-premises infrastructure including virtualization, directory services, databases, and web platforms to ensure system availability and data integrity.

- Performed regular system health checks, patch management, and vulnerability remediation to maintain a secure and stable operating environment.
- Implemented and maintained backup, recovery, and disaster recovery procedures to support business continuity requirements.
- Supported incident investigation and resolution related to system outages, performance degradation, and security issues.
- Documented operational procedures and recovery processes to ensure repeatable and auditable operations.

Medialine Romania

Infrastructure Specialist | ISO 9001&27001 Technical Lead

February 2015 - July 2016 (1 year 6 months)

Bucharest

- Led the technical implementation of ISO 9001 and ISO 27001, from initial gap analysis through control definition, remediation, and certification readiness.
- Translated security policies and compliance requirements into concrete technical controls across infrastructure and platform services.
- Designed, deployed, and operated secure services across virtualization, directory services, patch management, databases, and server platforms.
- Acted as an incident response lead for infrastructure and security issues affecting both Romanian and German headquarters.
- Coordinated remediation activities and follow-up actions to ensure incidents resulted in durable control improvements.
- Worked closely with management and auditors to provide technical evidence and operational documentation supporting compliance objectives.

TGA Systems GmbH

Corporate Network Administrator

June 2013 - February 2015 (1 year 9 months)

Bucharest, Romania

- Designed and operated secure corporate network infrastructure with clear segmentation and controlled access between environments.
- Planned and delivered the rollout of a second corporate headquarters, ensuring secure connectivity, monitoring, and operational continuity.
- Implemented network security controls including traffic segmentation, access filtering, and baseline monitoring.
- Introduced redundancy and failover mechanisms to support availability and business continuity requirements.

- Supported incident investigation and troubleshooting related to network availability, performance, and security events.
- Documented network architecture and operational procedures to support maintainability and audit readiness.

Konsalnet Security

System Network Administrator

April 2012 - June 2013 (1 year 3 months)

<http://www.konsalnet.pl>

- Operated and maintained daily network and security infrastructure, ensuring availability, controlled access, and operational stability.
- Implemented and managed firewalls, site-to-site VPNs, and secure WAN connectivity between locations.
- Supported incident investigation and response related to network security events and service disruptions.
- Designed and delivered secure connectivity for the opening of the Cluj-Napoca headquarters, integrating it with the Bucharest datacenter.
- Applied baseline security controls, monitoring, and access management to support business continuity requirements.
- Documented network configurations and operational procedures to support troubleshooting and audit readiness

MULLER DAIRY RO

Network Administrator

February 2011 - April 2012 (1 year 3 months)

- Operated and monitored server and network infrastructure to ensure availability, data integrity, and controlled access.
- Performed daily backup operations and verified recovery readiness to support business continuity.
- Applied endpoint hardening, patching, and basic security controls across Windows and Linux systems.
- Supported workstation upgrades and user access provisioning in line with internal security requirements.
- Maintained infrastructure and operational documentation to support troubleshooting and audit readiness

SC TEX-AS GROUP SRL

Computer Equipment and Network Technician

December 2009 - May 2010 (6 months)

Bucharest, Romania

- Installed and maintained basic IT and network infrastructure, including endpoints, printers, firewalls, and structured cabling.
- Supported network availability through uptime monitoring and basic troubleshooting.
- Assisted with system hardening and safe configuration of entry-level infrastructure components.
- Maintained internal websites and supported basic web services operations.
- Performed physical hardware diagnostics, repairs, and replacements to ensure operational continuity.

Mariocom

Network Administrator

July 2008 - September 2008 (3 months)

- Supported daily operation of a Microsoft-based local network, ensuring basic availability and access for users.
- Troubleshot connectivity and printing issues, restoring services in a timely manner.
- Produced technical reports and usage summaries to support internal operational tracking and decision-making.

Education

University POLITEHNICA of Bucharest

Not finished, Biotechnology · (2010 - 2013)

„Petre Andrei” University

Not finished, Psychology · (2005 - 2008)
